

America's leaders who have not made Jesus their LORD and accepted God and Jesus Christ into their hearts, are drifting from good judgment, into the distant horizon of a myopic view of dopamine driven gambling casino lunatic form of capitalism running riot that is working to destroy the future of most of the American people. The Economist Magazine has warned "without effective economic reforms the United

States will become a Banana Republic!" With becoming a Banana Republic, revolutions and regime changes become routine...

The concentration camps are already being built in the USA and Pres. Obama has already arranged for the "Mideast Coalition Forces" of the United Nations World Government to bring control of civil unrest, beginning with Canadian troops to occupy the USA at their discretion and without American invitation. The legal authorization protocols and treaties are already global law!

The foreign armies of the UN's USNORTHCOM that will eventually be used to put down "USA civil unrest" already has complete DIPLOMATIC IMMUNITY to enter the USA without invitation and to do as they wish!

The American Christians have been delivered into the hands of their enemies for the price of opposing a Christian USA Government and King Jesus in all levels of government. The United States is throwing ALL of the world's nations into the UN World Government which brings the promise of centuries of new "Dark Ages" from which the

United States will never return from. The plan is "Divide and Conquer" the USA and other nations into multiple "nations." Smaller "nations" will be even easier for the UN to rule and the already thirty-seven "Deemed Passed" Congressional pseudo-votes or pro-forma votes of the Congress where no recorded voting occurs is all the foolish "Rubber-Stamping" of legislation that the UN authoritarian government needs along with the pending treaty to remove the USA from the UN Security Council, so to empower and pass legislation and UN Resolutions to implement

the globalists coming never ending nightmare and eternal darkness upon what remains of the former nations of the earth.

The Christians, instead of rising up and fighting the good "fight of faith" as Jesus commanded His Father's Kingdom be established on Earth as it is in Heaven, are just sitting down in their "Pie in the Sky," Cinderella Psychosis, paralyzed by "unbelief" or fear of any thought of doing the godly works of God and country that Jesus Christ would do today to establish His Kingdom here on earth in government as the early

American colonies knew was their duty to God and for the people. As a result of opposing King Jesus and a Christian government, along with other sins as the sin of apathy, God and Jesus is delivering the USA Christians into the hands of their enemies in the UN World Government, just as God delivered ancient Israel into the hands of their enemies.

There is NO "Second Coming" in the Bible. There are multiple "comings" or manifestation of the presence of Jesus. There is also the Final "Coming" of the

resurrection at the "Last Trump" written of in First Corinthians chapter fifteen. The American Christians are truly sinful in opposing King Jesus in the USA government and instead do little or nothing effective so to help or allow their enemies take over the nations by default, Amen.

This article contains true and effective economic solutions and they must be passed into US Law.

Insufficient understanding of economic history, the economic variables and relevant datum sets

result in poor decision making rationales of "garbage in and garbage out."

As NewsWeek Magazine had on their front cover years ago describing the foolish dopamine gambling addiction view of depicting Wall Street as a quasi "Gambling Casino" was well understood. As political leaders are "drunk with power" cannibalizing the capital of future USA investments for the sake of Wall Street greed. As a Lehman Brothers memo had written "derivatives are basically to deceive the bankers, so the

taxpayers will be on the hook" to paraphrase. Its now all lust for their own desires, dopamine, or all madness which the Bible terms "Lunacy," just about all the time both in Washington DC and Wall Street. Just as the drunk "woman on the beast" of government in the Apocalypse, the politicians and Wall Street are drunk in the economic ruinous greed and unrighteous laws passed by Congress to bring about the slow ruin of the United States.

Congress needs to end exotic financial derivatives and re-

engage the safety financial banking laws of the FDR period that protected the banks from their past and future economic failure and cost of the lifeblood of the nation itself.

The financial exotic finance instruments of "Derivatives" helps drive instability and losses in economic recessions, increases volatility and increases the actual costs of capital raised for productivity. Derivatives should never been made US Law.

Although the "Command Economy" was discarded in favor

of radical predatory capitalism that would eventually economically ruin the United States, it remains the truth if properly managed for maximum manufacturing investment and productivity. There was no economic recovery until WWII which is usually asserted, however such a "recovery" was unsustainable as it was all deficit financed for the war effort. The USA has Orwellian Economics, a "Credit Card Economy," economic growth largely dependent on a crushing growing National Debt and is unsustainable economics in the long term. Certain

Economic Disaster resulting in eventual ruin of the domestic economy! As reasonable corporations want "Rule by Law" and not Darwinian Economics for beneficial long term prosperity. Worship of Darwinian or Greed at any cost economics or lawlessness as Alan Greenspan believed would "self correct!" Babylonian economics is condemned in the Bible in the Apocalypse. Predatory Greed Economics does not provide for the future and takes everything it can from future generation such as selling the lightwaves for commercial uses. Government,

as Godly Stewards must provide for future generations instead of plundering everything for the selfish few. Giving China the oil of the USA West Coast is insanely evil. China is an enemy as their relentless military buildup shows to anyone above the moronic imbecile level. However deluding spirits, being the curse of God Almighty, have taken even the brightest minds offline from reality in foreign affairs. Without repentance, there is NO HOPE FOR THE USA!!!

The correct understanding of history for sustainable growth is

the post-war investment in consumer goods manufacturing which brought an AMAZING growth in the general standard of living of about 4% per year, for the average American household.

What caused the collapse of the standard of living was letting go of the manufacturing sector in most areas to foreign nations.

Although the banks offer a little interest usury on deposits, it is not enough to cover the inflation of the dollar and the economic pressure of free trade forcing a general reduction in the standard of living.

The correct and ONLY TRUTH resulting in economic recovery is Congress changing key laws that will result in the general rise of the American standard of living for centuries to come. Failure will result in economic ruin and global dark ages being ruled by our enemies in the United Nations World Government.

You have a choice between the "inconvenient truth" or "convenient lies" in macroeconomics. The truth is qualified economists models' shows the empirical economics of

Free-Trade over a century would drive the American standard of living to sub-poverty levels for most people.

The Nobel Prize winners, as those who recently endorsed global climate change economic policies are also trying to literally ruining and breaking the economy for CFR globalist reasons so America's enemies will gain control and rule the United States as long as human life exists. Such blind stupidity is caused spiritually and by dopamine addictions as such deluding spirits bring. It's' a real "high" to

have an economic “free-trade” “flat playing-field” that will reduce the United States to economic ruin and Obama's “No-nation will be higher than another nation.” And so the utopian madness that has taken over the minds and souls of the economists and leaders will not yield valid economic solutions because of their globalist utopian spiritual masters they worship instead of the “only wise God” and King Jesus Christ our Lord. The Bible warns rejecting Godly solutions results in spirits of “strong delusion” resulting in the lunatic type of decision the

United States Government leaders are regularly making law.

As "God is Light" it is a sin for the FCC to sell the "lightwave spectrum." Capitalism is written in the Bible in its' worst form is a demonic religion selling men's minds, souls, and bodies as in Television advertisement.

Government leaders should be wise stewards of precious resources that are priceless and irreplaceable. "The Invisible Hand" of Adam Smith's Wealth of the Nations was actually the demonic hand of slavery and idols

of greed. Today "selling men's minds, and souls" for free-trade so to ruin the future of the American people is a sin against God.

A Baltimore, MD university professor recently wrote a simplified article on why producing wealth and exports must EXCEED imports or the level of the standard of living of most Americans falls correspondingly as the international "Balance of Payments" is made to pay for the US Trade Deficit. It is empirical economics and not a fantasy that economic decay and ruin is the

ONLY POSSIBLE OUTCOME for the United States in the not so distant future.

Consider the Carbon Tax "Cap and Trade" madness bill that will result in an ENRON Corp. type of market manipulation madness that will add to the economic ruin and downfall of the United States.

Ending free trade madness is not "shutting ourselves off from foreign goods," it is simply making foreign goods less aggressively priced and advantaged compared to domestic produced goods and

services.

Of course Fmr. Pres. Bush starting TWO HOPELESS wars in the middle-east with catastrophes, as the only possible outcomes, will add to the economic and social ruin of the United States. Dopamine and Spiritual Delusion and madness are working hand in hand to destroy all hope for the future of the nation.

The USA leaders sold their souls to the devil for free-trade, New World Order the UN World government, becoming the

world's policeman for the sake of the "Family of Nations Doctrine" where they "believed" that their enemies would rule over the USA for good and not for evil. Because of the dopamine and demons such a rational outcome is not possible.

Becoming the world's policeman while simultaneously destroying the long term viability of the American economy is lunacy, and destined for ruin and destruction.

If agnostics are serious about science, the fallacy of evolution of life from the simple to the

complex and all the relevant scientific facts and anyone else please contact www.reasons.org with Dr. Hugh Ross, a former professor of Astrophysics where all the actual facts of pure science are on God and Jesus Christ's side of “intelligent design” and Creationism. Dr. Hugh Ross is a “scientists’ scientist” as Apostle Paul was a Pharisee of the Pharisees and takes the scientists on with their own studies and tests away from evolutionary dogma to devolutionary reality of science from an initial designed creation state of biology and the universe

(all be it an old universe). As an example if there were trillions of years, there would not be an opportunity for meaningful amino acid DNA sequencing probabilities for a single "missing link," to be randomly formed into existence. It is all dopamine and madness in the public schools now and such disregard for facts in the science classroom is truly ruinous for the minds and future of the American people. Teaching students to be fools is poor education indeed. There is even reckless disregard for the need of "double-blind" reproducible test results in a

number of areas of "science" as schools program "garbage in and garbage out" the paradigm rationales of the helpless captive audience of the school children!

The students are NOT taught Critical-Thinking, but instead indoctrinated so to never look at the actual facts in state dogmas of religious civil government, the religion of life from ancient Egypt and Charles Darwin, and the fallacies of the macroeconomics classroom.

As the White House at the end of the Bush and beginning of Obama just wasted as much money as

possible in as stupid and senseless manner as possible, supposedly to "stimulate the economy" with no long term benefits to the nation was and is the loss of ALL reason for most leaders. Short term fiscal "stimulus" in reality is tragically a foolish waste of money and lost forever to future generations.

Congress continues to foolishly waste all the billions and trillions of dollars in the most foolish and stupid ways possible. Although the media remains silent due to the globalist world government objective, Congress has given the

Federal Reserve a "blank check" to buy foreign "TOXIC financial notes" of virtually any foolish type so to bankrupt the United States in a politically acceptable way.

The topical reasoning is to promote global currency stability and banking stability and devise "special drawing rights" for a utopian nightmare of global government tyranny. For years Congress has thrown money away on foolish short term myopic programs instead of long term investments in American productivity and building up manufacturing giving the real possibility of a better life and

higher standard of living for future generations. I have noticed Japanese news media is quite open about the globalist United Nations World government objectives where America's media SILENCE lulls the public asleep so they may figuratively "cut their throats" with a silent takeover of the American people.

Just as ancient Israel rejected entering the promised land and God hated them for it (Hebrews 3, Holy Bible) so also God hates the Christian people that have rejected entering the promised land of America. "Manifest

Destiny" was God's plan for American to "be the head and not the tail" of the world nations and the Christians said they would oppose God's Kingdom here on earth in government as Jesus would do and as a result deserve God's judgment, if there is no repentance, of entering another "DARK AGES" for centuries to come...

As Christians you and I are to "speak the truth" to one another about the coming economic recessions in America's future. The Bible mandates a free market managed capitalism for the

benefit of the nation and not for its eventual certain ruin as Congress has done.

Nobel Prize winning Economist Joseph Stiglitz has stated a RECESSION will occur sometime late 2010 AD. The business cycle and the nation living on borrowed debt with a national credit card gives a high standard of living that is not-sustainable in coming years. The relentless economic pressure of “free-trade” will drive the US Economy cascading down, ruthlessly spiraling downward to third-world economic and political status over a hundred year period

according to economists warning of the dire long-term consequences of global free-trade prior to the NAFTA trade agreement. The seventeen Nobel Prize Economists who endorsed the NAFTA trade agreement did so on the foolish premise of supporting the United Nations World Government objective and ignored ALL OF THE ECONOMIC DATA and modeling!

In psychology there is a "Cinderella Psychosis" where "Prince Charming e.g. Jesus Christ" will come and "fix up everything and the USA will live

'Happily Ever After.'" In church heresies this is titled: "The Pre-Tribulation Rapture Millennium." Christians need to repent of doing nothing and letting God's enemies take over and destroy the nation's future. Ignorance is no excuse, "what is not of faith is sin" and letting God's enemies rule the children and the future is tragic sin.

Pres. Obama says the USA "will not take second place." However that is once the USA reaches third world status where his foolish objective of world government where our enemies

will eventually gain control in the UN when in the coming decades the United States is economically castrated and ruined by free trade and our enemies who will own the nation.

The solution is to have passed into US Law The Christian America Amendment found at www.ChristianAmendment.com and eventually break all international treaties that are in violation of international treaties such as the UN and World Trade Organization Treaty according to the conscience of judges and the leaders that you freely choose to

elect to govern America.

The financial solutions include restoring the former banking laws of protecting the banks from temptation to destroy themselves in the financial markets. Ending derivatives, a parasitical investment tool, which The Economist Magazine and others say are necessary for bringing in foreign investment. However AIG was in the "black," solvent and in good overall financial shape, except for derivatives from their London office (e.g., self serving for Britain's advantage at the expense of the USA) for

derivatives that caused the near bankruptcy. As a Lehman Brothers memo had written, derivatives are basically to "cheat," bilk and deceive the bankers and bring wealth and profits to Wall Street at the expense of the US Treasury and American people. Exotic investment tools are usually all evil, all the time.

With King Jesus honored and people in good conscience providing guidelines for moral and ethical behavior in laws and regulations in government the nation will have a prosperous

future.

As the Law of Moses has written, if the nation will not obey God and His Son Jesus today, He will raise up more and more enemies and destructions to ruin and eventually destroy the United States just as God destroyed ancient Israel. God is always the same, and disobedience to Biblical laws and ethics will result in third world status and being ruled by our enemies in coming years...

Prosperity economic policy laws, such as China's artificial currency

devaluation helped China's economic growth by such great amounts, it has reached as high as 10.7% growth rate of GDP. The Argentina devaluation of their currency by a whopping fifty percent in 2,009 AD is needed to save America from falling to third world poverty as the CFR Council of Foreign Relation has planned so to smash the last remaining resistance to their evil plans for total world government by the United Nations. The USA Dollar needs to be devalued by a modest amount so to eliminate the trade deficit completely and eventually to increase American exports so

to profit the future of the American people. Also needed include managed trade with modest tariffs and tax incentives for bringing the factories back to the USA, so once the new domestic factories are built, the foreign factories will be prematurely obsoleted and closed.

Although free-trade is driven by absolute capital formation levels and pernicious-greed, it is basically the "Nation-Building" plan of the "Family-of-Nations" world government plans of the State Department doctrine. The

corporations and elite will make enormous amounts of money cannibalizing productivity investment capital and sending it to foreign nations for maximum profits. The "level playing field" free trade policy is national economic suicide. The planet will eventually be environmentally trashed and the nations enemies will grow militarily into tyrannical super powers. Although economies such as China, Russia, Brazil are not cooperating with the "New World Order" and maximizing the prosperity of their nations, the CFR plan is to keep the USA on top of the command

and control structure of the United Nations until all the world's nations implode economically and are stampeded into the utopian coming nightmare of the rule of God's enemies in the United Nations for centuries or more.

Life under the United Nations will be truly a terror for future generations of children to be ruled by their enemies in a tyrannical world government for as long as life exists on the planet, which will probably be at least several more centuries. The reason the tyrannical UN will

exist until the end is once the independence of the USA is lost, there will be no one to free and liberate the people's of the earth from their masters and torturers. Doing anything less then these basic economic solutions will eventually ruin and destroy the future of the United States. Although some as Fmr. UN Ambassador John Bolton tries to turn public opinion back, treaty law has trumped US Constitutional Law and rule by tyrannical fiat of the UN World government will be the end result of the failure of educational system in the near dark future to

come...

Death Memorial of The American Dream

Revelation chapter eighteen has condemned predatory parasitical free trade capitalism. "Selling the Bodies, Souls, and Minds of men," as in Television advertising, poisoning their food supply, selling the nation to foreigners and selling the lightwave spectrum. The Bible

also condemns trade treaties with God's enemies. Jesus said to "loan to your enemies" but not enough capital for them to build up so to eventually destroy and rule over the United States as China and Russia plainly intend to do.

Instead of trading truth for lies in economics of an "America First" national policy and giving domestic capital formation favorable tax laws and discouraging multinational corporations from "beggar Thy neighbors" so to help foreign nations. Jesus defined

"neighbor" as a Samaritan, a Jewish sect related to then the true Jewish religion. Jesus did not define "neighbor" as Arab enemies, but those who were actually of true faith and your neighbors next door. The world religion today is "the New Religion of Civil Government" which quoted from Thomas Jefferson does not mean making your enemies part of the "family of nations," but the direct opposite.

Wall Street USA is a good place to raise capital, however little is invested domestically because of

the anti America First policy in order to empower the U.N. World Government by the death of the American Dream.

The foolish and effective policies of Congress are to only stave off the inevitable, while providing political stability and maintaining global control until American monster creation of the United Nations takes full control of all aspects of world government. I wish there was something good to say about what American leaders are doing. God has truly sent deluding spirits so the leaders are no longer are capable

of reason and truth. As the Law of Moses has written, and God is "always the same," as America has rejected Jesus from ruling government, as ancient Israel rejected Jesus the Messiah, so God will raise up more and more enemies as time goes on so as ancient Israel was destroyed under the Roman World Government, so America will be destroyed and made destitute and made a ruin by the UN World Government.

The nefarious Council of Foreign Relations, CFR members are working to secretly throw the

USA under control of the UN World Government and State Department are dead-set and hell-bound for throwing the American people under the rules and regulations, (already some regulations are being published as law daily in the US Federal-Register), of the United Nations under the New World Order or “Family of Nations Doctrine” which fantasizes normalizing Turkey, Iraq etc. will all eventually be normalized enough to rule over the USA and the United Nations wanting what is best for themselves. However history shows the enemies of God

will want to do their worst against Christians, and the Jews because of the nature of the spiritual battle that God has elected to train Christians to be suitable companions for Jesus and each other for eternity. Grace, Peace, and Blessings and Love in God and Jesus Christ our Lord for you and all those who love the presence of the Holy Spirit.

Empirical or Fundamental Economic Vectors of Change of the Economy are:

1.) Restore former banking

protection laws to their former regulations to protect the banks from the global economy.

2.) Outlaw "derivatives" which are exotic instruments that serve to deceive and exacerbate the downfall of the economy.

3.) End free-trade, replacing it with managed-trade for a prosperous USA that will have the economic vitality to be the global superpower. Or eventually perish at the hands of the enemies of the United States which are growing militarily in power and might with the technology necessary to carry out their evil desires.

4.) Change federal incorporation laws to promote an America First nationalism and a prosperous future for the USA.

5.) Buy American made products policy by governments encouraging domestic manufacturing as much as possible.

6.) Investment Tax Credit proposed by Bill Clinton and John Kennedy of 10% for ten years to provide maximum domestic manufacturing and encouraging the closing of foreign manufacturing.

7.) As France, have the military run the nuclear power industry so

costs may be reasonable as in the military reactor programs and the safety be correspondingly near perfection.

8.) Import Concrete, which has been banned by Congress so structures and roads will last as long as possible. Build everything with high MTBF reliability for the future instead of maximizing profit at the cost of future generations with shoddy products and high maintenance roads.

9.) Change labor laws so outlawing more than eight hour shifts in anything outside of the retail service with a ten hour maximum, so safety and family

stability is improved. The mandatory twelve hour shifts are what caused the Three Mile Island (ex military operators) to rebel because it is inhumane and stupid. Disrupting people's lives for seven different jobs because of the "changing economy" as Economist Laura Tyson under Pres. Bill Clinton said was "good" is predatorily evil and highly destructive to God's plan for stable extended multigenerational FAMILY relations, friendships and culture, social and economic stability. Careers should be highly specialized for one's entire lives

instead of expecting people to be like animals and jump the hurdles so greed and evil will prevail in a global economy, instead of a prosperous national economy.

10.) Increase classroom time from fifty-five minutes to eighty minutes per class period and extending the school day about an hour is necessary for teachers to mentor the students individually, so no child will be left behind in the three "R's."

Vocational education must begin for most students in high-school and policies from successful nations such as Germany, and Japan just be adopted for school

discipline and helping the children be successful. 30% school dropout rates mean eventually the social disruption levels rising so that the concentration camps are being prepared for in the USA will be necessary very soon. Save yourselves,

Save your Children and Save America Today!

Amen
